V	TOTAL OUTCOMES [T + U] Excludes Owner/Guardian Requested Euthanasia (Unhealthy & Untreatable Only)	308	168	476
W	ENDING SHELTER COUNT (date)	17	8	25

In a perfect world, the Ending Count is equal to the Beginning Count (A) plus Total Intake

(F) minus all Outcomes (R+V). -----> 17 8 25

If your reported Ending Count does not match these numbers, please go back through your data and be sure you didn't miss something (i.e., animals in foster, adoptions, transfers, etc.). If all animals have been accounted for and the reported Ending Count is different, please indicate in the comment section.

"Public" for us includes adoption returns and surrenders from vet hospitals. We do not accept animals directly from the public. Transferred animals are always classified as "healthy" when transferred even if intaked otherwise, but animals are adopted from the class they were intaked as even if a rehabilitable condition was fixed and the animal is considered "healthy"

I agree that in completing this form, we have used the Maddie's Fund definitions of "Healthy," "Treatable - Manageable," "Treatable - Rehabilitatable," and "Unhealthy & Untreatable" as set forth in the attached document titled, "Maddie's Fund® Categorizations/Definitions of Shelter Animals."
